

The semi-smooth Concept envelopes will display artwork to great effect. The 12 gore envelopes are constructed by sewing together 24 gores. Each half-gore consists of six nylon panels, including two quarter lenticular panels. The narrow row of panels at the base of the balloon (those from the mouth) is made from heat resistant Nomex.

References for the panels - from the nomex upwards - are A, Bx, By (lenticular panel), Cx, Cy (lenticular panel) and D.

A parachute top is standard. This is constructed from 20 panels that radiate from a centre patch.

There is no extra charge for changes of fabric colour at any of the lines shown on the chart if the colours are from the standard Cameron range.

Not to scale

Tick one standard load tape colour. White will be used unless indicated otherwise. BLACK WHITE
